

MSL 20 RV PUMP

MSL 20 COMPLETED PUMP SET

Rotary Gear Pumps

APPLICATIONS

- Transfer of various grades of oils like light Diesel Oils, Fuel Oils, Transformer oils, lube oils, castor oils, Grease, wax etc.
- Transfer of chemicals like sodium silicate, caustic soda, resins, enamels, adhesives fatty acids, paints and varnish, pulp, juices, Syrup, Alcohol, kerosene...
- Atomising of fuel oil at high pressure for burners and boilers
- Lubrication of gear boxes, cranes, Machine tools etc.
- Cooling and filtering in machine tools.
- Heat transfer liquids for chemical vessels.
- Hydraulic systems for presses, power pack units etc.

MSL 200 RV COMPLETED PUMP SET

These pumps are simple in design and robust and sturdy in construction . Only tested materials are used to give them long life. They are built in various sizes and versions to suit every possible industrial application.

These pumps available either foot mounted or flange mounted.

Pressure range – 0 kg /cm to 25 kg ./ cm

Capacity – up to 4000 LPM

Viscosity : 5-1500 cst

Temperature : standard 80°C , option 170°C

Size – 3/8" to 8" Inlet – outlet

SPECIAL FEATURES

- Direction of rotation can be given as per client's requirements.
- Suction and delivery have threaded connections up to 20" BSP. Flange connections can be given on request 3" & above pumps have integral flange connection
- As per clients requirement pumps is provided with electric motor, gear box, diesel engine, base plate, coupling, guard, flanges, pulley & Belt Drive. Trolley Mounted, etc.
- Pump are also available in steam jacketed design specially suitable for liquids which solidify or become highly viscous at room temperature like LSHS, Wax, coal Tar, Adhesives, etc.
- Pumps are fitted with Mech. Seal, Gland Packing or oil seal as per client's requirements.
- Pumps are available under low pressure range (0 to 10 kg/ cm) as well as high pressure range (11 to 40 kg/cm) On the basis of requirement.
- Pumps are available in SS 304, SS 316, A 216 Gr. WCB, mild steel, gun metal , Aluminum Material also.
- Pumps can be offered with external bearing design suitable for liquids which do not have lubricating property like molasses, high temp. oil, corrosive abrasive liquid, Pharmaceutical Products, etc.
- Pumps are designed , mfd & tested as per API Std 676
- A built in relief valve is provided in Pump Back cover . It can be adjusted externally to ensure that the pump does not build up pressure above certain preset limit. This prevents overloading of the motor as well as probable damage to the pump.

SPECIFICATION:

Model	Flow		Max Discharge Pressure Kg/cm ²	Port size Inlet - outlet(mm)	Speed RPM	Suggested Power Kw	Relief Valve
	m ³ /hour	Lit/min
